THE PELICAN HISTORY OF  
MUSIC

The concert-goer and music-lover anxious to discover some of the hidden wealth of musical history will find in this series of three volumes an account of many kinds of music: primitive and non-Western, liturgical, medieval, renaissance, baroque, classical, romantic, and modern. Although there is some technical analysis, the authors and editors have concentrated on fitting music into its proper frame, whether ecclesiastical, courtly, or popular.

Each musical epoch is discussed by an expert who considers the music at its face value, instead of thinking of it merely as a link in a chain of development ending in the music of Beethoven or Boulez. The reader can therefore come to understand musical trends and styles both within and without the normal orbit of concerts and opera, and will be able to enjoy unfamiliar music as well as the accepted classics.

A special feature of each volume is the group of illustrations that have been chosen to set the scene rather than to illustrate any specific points in the text. This is the second volume to have been published.
